"Taking Care of the Details"

Dear FPC Clients,

As we continue to struggle through this tough economic environment, I would like to pass along some findings of a recent Microsoft Survey on Small Business IT Trends. This survey included over 600 Microsoft Small Business Specialist that work with Small-to-Mid sized businesses.

According to the survey, many companies are focused on reducing operating costs and improving employee productivity. Over the past year, we've been working on adding several new solutions that provide these benefits to small and medium sized organizations.

- FPC Total Care (Flat-Rate, Fixed-Fee IT Support Services)
- Collaboration Solutions
- Server Virtualization
- QuickBooks Enterprise Solutions

Ask us how these solutions can help provide these benefits. In May we will be hosting a FREE Lunch-n-Learn on Server Virtualization.

I also have two very exciting announcements. First, Microsoft has awarded FPC with the Gold Certified Partner status. This is Microsoft's highest level of partner recognition.

Second, we are now the only Intuit Solutions Provider in Northeast Indiana. Our focus will be on QuickBooks Enterprise Solutions (QBES). QBES is the big brother to QuickBooks, basically the same user interface and ease of use, but with more muscle.

Check out our new website: www.quickbooksindiana.com.

We are also continuing our series of FREE Lunch-n-Learn events. Additional details on these events are included below in this newsletter.

- QuickBooks Enterprise – April 8th – 11:30 am
- Small Business Server 2008 – April 22nd – 11:30 am

Thank you for allowing us to be your IT Solutions Partner,

Scott Steffen

4 Reasons 'Virtualization' Saves Money

Most articles about virtualization discuss the technology in the context of "big" business. They are glowing about the potential for "data center consolidation" or "reduced system maintenance expenses." Or they rave about the prospects for a better disaster recovery plan, better security and extra flexibility for employees.
